

How do I list all of my projects (GIDs)?

You can view the project group IDs (GIDs) that you belong to by logging into the myNAS portal or by running the `thegroups` command.

The myNAS portal shows all the GIDs you belong to, along with their project names and descriptions, and provides a central location where you can easily monitor your PBS jobs and check allocation and usage. For more information, see [Using the myNAS Portal](#).

You can run the `groups` command with your username to list all the GIDs that you belongs to. The following example shows that user *zsmith* is a member of the groups a0800, a0907, and e0720:

```
%groups zsmith  
zsmith : a0800 a0907 e0720
```

If you do not know the project names that the GID numbers represent, you can check the myNAS portal or contact the NAS Control Room at (800) 331-8737, (650) 604-4444, or support@nas.nasa.gov.

For more information about project groups and GID charges, see [Charging to a Project Group ID \(GID\)](#).
